

The [NCWIT Collegiate Award](#), sponsored by Hewlett Packard Enterprise and Qualcomm, honors the outstanding technical accomplishments of college women of any year of study. Conferred annually, the Award recognizes technical contributions to projects that demonstrate a high level of creativity and potential impact.

Help is needed to review the Award applications. Please read the following reviewer guidelines; more detailed instructions will follow upon registering.

- The review period is February 1-28, 2017. There is no deadline to sign-up to review as long as reviews are completed by 8 pm MST February 28, 2017.
- The minimum time commitment is 2.5-3 hours. Each application takes approximately 45-60 minutes to review and we ask that each reviewer read at least three applications.
- The application includes a one-page technical abstract, a 4-6 minute video presentation, three short answer essay questions and a recommendation letter. Reviewers are asked to provide comments about the application sections and an overall assessment.
- These are technical applications submitted by college students, so a technical background is necessary (either be currently working in a computing related field, or have graduated with a computing degree).

If you are interested in reviewing applications for the NCWIT Collegiate Award, please [sign up here](#) (**important note:** although this is the college portal, if you already have an account with us, you can use your same username and password).

If you have any technical difficulties, please contact us at aichelp@ncwit.org.

Looking forward to working with you!
